The Natural History is a work by Pliny the Elder. It is one of the largest single works to have survived from the Roman Empire to the modern day and purports to cover all ancient knowledge. The work's subject area is thus not limited to what is today understood by natural history; Pliny himself defines his scope as "the natural world, or life". It is encyclopedic in scope, but its structure is not like that of a modern encyclopedia. It is the only work by Pliny to have survived, and the last tha

Shelves: ficção, fantasia. A Natural History of Dragons is a faux-memoir by an aristocratic lady scientist, a dragon enthusiast. The book had a very strong start, the chapters on her childhood are so promising, and the commentary on women's total legal dependancy on their husbands was very interesting.

Natural history reproduction. Many features of the penguin life cycle vary with body size and geographic distribution; the chronology of breeding may also vary within a species in relation to latitude. The majority of species breed only once each year. Certain species, such as the African penguin (*Spheniscus demersus*), probably other members of this genus, and the blue penguin, breed twice a year.
