Winner of the National Outdoor Book Award for Design and Artistic Merit: "This book is a work of art from every possible angle - from the exquisite photographs, to the book's design, to its flawless printing and production process. . . . Hall has everything right in this book. There is nothing extraneous, and nothing missing. This is a complete and moving immersion in the breathtaking underwater world of the Pacific Northwest." - National Outdoor Book committee "David Hall shoots with the inquiring and exacting eye of a scientist yet the soul and vision of an artist, combining the two to produce uniquely beautiful underwater images that educate as much as they inspire." -Christopher Newbert, author of *Within a Rainbowed Sea* Please see a four-minute promotional video on the Author Page In *Beneath Cold Seas*, author and photographer David Hall takes us into the underwater world of the Pacific Coast from California to Alaska, home to the most diverse and spectacular marine life of any temperate or cold-water ecosystem on the planet. From the tiny, candy-stripe shrimp, giant Pacific octopus, ghost-like hooded nudibranchs, and migrating sockeye salmon to the world's largest sea lions, Hall's stunning photographs and lively text reveal many fascinating species interrelationships and rarely observed animal behaviors. An innovative approach to over/underwater photography places the marine life of the Pacific Northwest in familiar context with hauntingly beautiful images that will surprise even experienced divers and delight the rest of us. An introduction by Sarika Cullis-Suzuki focuses on the conservation issues facing this rich yet vulnerable ecosystem. David Hall is an award-winning photographer and photojournalist with an international reputation whose work has been published in magazines such as *National Geographic*, *Smithsonian*, *Natural History*, *Time*, *BBC Wildlife*, *Geo*, and *Terre Sauvage*. He is the co-author of ten children's books in Scholastic's *Undersea Encounters* series and co-author of the scientific paper describing the famous "psychedelic frogfish," for which he received

In a book with 150 color photos, the author offers a vivid look at the diverse creatures teaming beneath the surface of the Pacific Ocean.

Underwater photography is a fascinating pursuit for those who aspire to capture the magical world found within our oceans and bring it to the surface. In this book, award-winning photographer Tobias Friedrich teaches us how to create stunning underwater images, covering everything from the equipment needed, to creating powerful compositions, to processing the final image. He uses case studies to show how his own images were created, and provides detailed explanations for specific techniques that can be applied to your very next dive. The text is supported by images from some of the most beautiful diving areas on Earth. Also included are countless tips and tricks for the beginner and intermediate photographer. Topics

include: Choosing the right equipment Composing your images Wide-angle photography Macro photography Image editing Case studies Diagrams of shooting positions An added bonus is the 22-page Guest Gallery featuring images by some of today's most recognized names in underwater photography, including Ernie Brooks, Alex Mustard, Richard Salas, Imran Ahmad, and Eric Cheng. The abundance of breathtaking underwater images contained in this book is sure to inspire you to plan your next dive. Foreword by Ernie Brooks.

Including all of the photographs of the original edition, the renowned underwater photographer takes readers on a journey of incredible beauty and mystery, through the seas off Cozumel, Belize, Kona, Fiji, Palau, Truk, and the Great Barrier Reef. Reprint. 25,000 first printing. IP.

The ocean covers more than seventy percent of our planet, and yet we rarely glimpse its depths - and especially its exquisite beauty as documented by legendary photographer David Doubilet. His work in and on water has set the standard for decades. In this remarkable and highly-anticipated collection by artist and diver David Doubilet, whose innovation, eye for beauty, and passion for conservation have long set the bar for underwater photography, Doubilet unites life above and below the water's surface. Spotlighting a stunning selection of images from Doubilet's 50-year career, spanning the Galapagos to the Red Sea, the icy waters of the Antarctic Ocean to the tropical Great Barrier Reef, the body of work raises important questions about conservation and global warming, topics never far from the headlines. 'I want to create a window into the sea,' he says, 'that invites people to see how their world connects to another life-sustaining world hidden from their view.'

Meet the world's most fascinating sea creatures—see the lives and curiosities of colorful fish and coral reefs—this spectacular volume has more than 300 color photos and extraordinary text from a leading marine biologist and underwater photographer, and the international expert on seahorses. In this richly informative volume, brimming with new discoveries and more than three hundred colorful images of jaw-dropping fish and coral reefs, you'll swim in the Atlantic, Pacific, and Indian Oceans; you'll be dazzled in the Coral Triangle and amazed in Triton Bay. Up close you'll meet the Cenderawasih fairy wrasse, with its florescent yellow streak; the polka-dot longnose filefish; and the multicolored seadragon. There are scarlet-colored corals, baby-blue sponges, daffodil crinoids, and all sorts of mystifying creatures that change color at the drop of a hat. The whale shark is almost larger than life and the author's beloved pygmy seahorse, unless photographed, is almost too tiny to see. The wondrous creatures inside are charmers and tricksters and excel in the arts of seduction and deception, and you'll have the rare chance to see and delight in their antics. You'll also learn what they eat, how they play, and how they care for one another, live on one another, and mimic others when they're afraid. There is also compelling insight into the naming process, which sea creatures are facing extinction, and how we can help them before it's too late.

A collection of Brian Skerry's ocean photography, including sharks in the Bahamas, leatherback sea turtles in Trinidad, and right whales in the Auckland Islands.

Hypothetical scientific tours of the ocean depths present information on the mysterious creatures that live there.
