Most electrical problems can be easily fixed by checking the following: The wiring in the the trunk that is attached to the battery. The location of the fuse box on a BMW. Most BMWs have the fuse box located in the glove box compartment. Older BMWs have it in the trunk near the battery, so check both these locations.

Some E46 models will have an airbag warning light illuminated permanently on the dash, which can often be a wiring, rather than actual airbag fault. In many cases the wiring loom to the airbag pressure sensor was too short, and repeated movement of the seat further back can pull on this, damaging the wire resulting in a fault showing on the dashboard.

The E46 interiors, as a general rule, hold up well. Problems are usually limited to a failed radio display. The sunroofs are also a problem area on early E46s. BMW's fix sometimes involves replacing almost the whole sunroof. To prevent problems it is recommended to grease the sunroof tracks regularly to keep the sunroof from failing.
