MTS (MariFlex Transfer Services) STS transfer : Expert operation where cargo/crude oil/petroleum products/liquefied gas are transferred between ships made fast alongside each other. Such operations may take place in port, at anchor or underway.

General principles. Conditions and requirements. Communications general communications, language, pre arrival communications.

Special edition of the Federal Register, containing a codification of documents of general applicability and future effect ... with ancillaries.

Title 33-NAVIGATION AND NAVIGABLE WATERS is composed of three volumes. The contents of these volumes represent all current regulations codified under this title of the CFR as of July 1, 2017.

This illustrated guide explains how good shipboard survey practice can significantly reduce the risk of shortage and contamination claims arising from loading or discharging crude oil and petroleum products.

This publication contains the text of guidelines for inert gas systems and relevant IMO documents on inert gas systems and supersedes the publication 860 83.15.E.

Over the past twenty years there has been considerable improvement and new information in the design of port and berth structures. This handbook reflects the latest progress and developments in navigation safety, port planning and site selection, layout of container, oil and gas terminals, cargo handling, berth design and construction, fender and mooring principles. It presents guidelines and recommendations for the main items and assumptions in the layout, design and construction of modern port structures, and the forces and loadings acting on them. The book provides an evaluation of different designs and construction methods for port and berth structures, and recommendations given by the different international harbour standards and recommendations. Practising harbour and port engineers and students will find the handbook an invaluable source of information.

The Condition Assessment Scheme (CAS) for oil tankers was adopted in 2001 and is applicable to all single-hull tankers of 15 years or older. Although the CAS does not specify structural standards in excess of the provisions of other IMO conventions, codes and recommendations, its requirements stipulate more stringent and transparent verification of the reported structural condition of the ship and that documentary and survey procedures have been properly carried out and completed. The Scheme requires that compliance with the CAS is assessed during the Enhanced Survey Program of Inspections concurrent with intermediate or renewal surveys currently required by resolution A.744(18), as amended.--Publisher's description.
