A richly illustrated full-color guide to the unique plants, wildlife, and environments of Cape Cod and the other nearby "Outer Lands" that face the Atlantic Ocean This essential guidebook presents the most abundantly illustrated and fascinating account of the natural history of Cape Cod, its nearby islands, Block Island, the western coast of Rhode Island, and southeastern Long Island ever published. Exploring the ecology and most common plants and animals of the various regional environments--beaches, dunes, salt marshes, heathlands, and coastal forests--the book also encompasses marine mammals, sea turtles, and fish offshore. For nature-loving local residents and visitors alike, this essential book will be a treasured resource.

J.G. Ballard is one of the most significant British writers of the contemporary period. His award-winning novels are widely studied and read, yet the appeal of Ballard's idiosyncratic, and often controversial, imagination is such that his work also enjoys something of a cult status with the reading public. The hugely successful cinematic adaptations of *Empire of the Sun* (Spielberg, 1987) and *Crash* (Cronenberg,

1996) further confirm Ballard's unique place within the literary, cultural and popular imaginations. This guide includes new critical perspectives on Ballard's major novels as well as his short stories and journalistic writing covering issues of form, narrative and experimentation. Whilst offering fresh readings of dominant and recurring themes in Ballard's writing, including history, sexuality, violence, consumer capitalism, and urban space, the contributors also explore Ballard's contribution to major contemporary debates including those surrounding post 9/11 politics, terrorism, neo-imperialism, science, morality and ethics.

Three mysteries precipitate an investigation into an otherwise ordinary suburban property, revealing a past inextricably woven into four centuries of American history. When Eleanor Phillips Brackbill bought her suburban Westchester house in 2000, three mysteries came with it. First, from the former owner, came the information that the 1930s house was “ a Sears house or something like that. ” Thrilled to think it might be a Sears, Roebuck & Co. mail-order house, Brackbill was determined to find evidence to prove it. She found instead a house pedigree of a different sort. Second, and even more provocative, was the discovery of several iron stakes protruding from the property ’ s enormous granite outcropping, bigger in square footage than the house itself. When queried about them, the former owner told her, “ Someone a long time ago kept monkeys there, chained to the stakes. ” Monkeys? Was this some kind of suburban legend? A third mystery came to light at closing, when a building inspector ’ s letter contained a reference to the house having had, at one time, a different address. Why would the house have had another address? Her curiosity aroused, and intent upon finding the facts, Brackbill gradually peeled back layers of history, allowing the house and the land to tell their stories, and uncovering a past inextricably woven into four centuries of American history. At the same time, she found thirty-two owners, across 350 years, who had just one thing in common: ownership of a particular parcel of land. An Uncommon Cape not only tells the story of an eight-year odyssey of fact-finding and speculation but also answers the broader question: “ What came before? ” and, through material presented in twenty-two sidebars, offers readers insights and guidelines on how to find the stories behind their own homes.

“ A detective story set in her own backyard, Eleanor Phillips Brackbill ’ s book shows the rich stories even our own homes can tell us if we take the time to hear them. What to most looks like a common residential Cape-style home in a suburban neighborhood can tell us more about ourselves as New Yorkers than anything we learned about in school. This book is a testament to the value of historic preservation and an appreciation of all that is our past, including our victories, our failures, and our faults. ” — Jay A. DiLorenzo, President, Preservation League of New York “ Eleanor Phillips Brackbill ’ s in-depth genealogy/biography of the house in which she lives and the land on which it sits is a brilliantly written model of superb research and storytelling. It recognizes the opportunity, perhaps the responsibility, to learn and record and pass along to future generations all that can be found out about the history of property for which we are transient stewards. Her Uncommon Cape is a perfect vehicle for bringing back to life four centuries of enthralling regional (and American) history while allowing many interrelated, but yet unsolved, mysteries to live on. Brackbill ably succeeds in convincing us that the past is not even past! ” — Charles Duell, President, Middleton Place Foundation and author of Middleton Place: A Phoenix Still Rising “ Home ownership has become, for better and for worse, a profound part of contemporary American identity. Eleanor Phillips Brackbill delves into this terrain—quite literally—by piecing together the genealogy of her home, which she reconstructs through diligent archival detective work (and even the occasional late-night trek through the woods). As such, her study is as much about the craft of historical inquiry as it is about the vicissitudes of a particular chunk of real estate. With sidebars that offer research tips placed throughout the text, the book will be a useful guide for those interested in pursuing their own historical investigations. ” — Michael Lobel, author of James Rosenquist: Pop Art, Politics, and History in the 1960s “ A page-turning read. I got totally caught up in the history of a county, a country, and a sturdy little house. Brackbill ’ s meticulous research fascinates and will cause me to dig into my own house ’ s story—its moves, its occupants, and its alterations. ” — Lucy Hedrick, author and publishing coach

...Report discusses areas at water table that contribute water to public supply wells; uses a particle tracking method to delineate contributing areas to public supply wells in Bourne, Falmouth, Mashpee and Sandwich; results indicate that the size and shape of the contributing areas are dependent upon the location and pumping rates of the public supply wells...
