An increasing amount of research is being developed in the area where technology and humans meet. The success or failure of technologies and the question whether technology helps humans to fulfill their goals or whether it hinders them is in most cases not a technical one. User Perception and Influencing Factors of Technology in Everyday Life addresses issues of human and technology interaction. The research in this work is interdisciplinary, ranging from more technical subjects such as computer science, engineering, and information systems, to non-technical descriptions of technology and human interaction from the point of view of sociology or philosophy. This book is perfect for academics, researchers, and professionals alike as it presents a set of theories that allow us to understand the interaction of technology and humans and to put it to practical use.

Inspired by the dialogue between practitioners and academics of nearly thirty countries, this edited volume includes updated articles on global crime prevention initiatives and best practices in building community resilience presented at the International Police Executive Symposium's (IPES) 25th annual meeting in Sofia, Bulgaria in 2014. A new book in the highly-regarded IPES Co-Publications series, Global Perspectives on Crime Prevention and Community Resilience offers strategies for crime and violence prevention and community initiatives for crime reduction, while promoting current best practices for police effectiveness, safety, and professionalism. The book includes eighteen chapters from police leaders, practitioners and academics around the world in efforts to demonstrate effective strategies for the prevention of crime and innovative techniques in assisting crime victims. In an increasingly global reality, this text gives voice to valuable members of the international policing community.

ITI Technician Medical Electronics is a simple e-Book for ITI Technician Medical Electronics JOB Interview & Apprentice Exam. With the emphasis on market-led development initiatives, sustainable urbanization is a challenge, especially in growing nations. Regional administrative efforts are crucial for cities to meet the planned city operations and specific targets and objectives. The Handbook of Research on Urban Governance and Management in the Developing World is a research publication that explores contemporary issues in regional political and administrative practices and key challenges in implementing these strategies in growing nations. Featuring coverage on a wide range of topics such as urban and regional economics, supply chain management, and environmental concerns, this book is geared toward city development planners, policy makers, researchers, academics, and students seeking current and relevant research on the regional bureaucracy and its practices and how they affect growing nations.

This book presents the proceedings of the 20th Congress of the International Ergonomics Association (IEA 2018), held on August 26-30, 2018, in Florence, Italy. By highlighting the latest theories and models, as well as cutting-edge technologies and applications, and by combining findings from a range of disciplines including engineering, design, robotics, healthcare, management, computer science, human biology and behavioral science, it provides researchers and practitioners alike with a comprehensive, timely guide on human factors and ergonomics. It also offers an excellent source of innovative ideas to stimulate future discussions and developments aimed at applying knowledge and techniques to optimize system performance, while at the same time promoting the health, safety and wellbeing of individuals. The proceedings include papers from researchers and practitioners, scientists and physicians, institutional leaders, managers and policy makers that contribute to constructing the Human Factors and Ergonomics approach across a variety of methodologies, domains and productive sectors. This volume includes papers addressing the following topics: Transport Ergonomics and Human Factors (TEHF), and Aerospace Human Factors and Ergonomics.

Provides questions for managers to ask at job interviews to help identify such qualities as leadership, initiative, people skills, organization, competence, and creativity

Threats of terrorism, natural disaster, identity theft, job loss, illegal immigration, and even biblical apocalypse--all are perils that trigger alarm in people today. Although there may be a factual basis for many of these fears, they do not simply represent objective conditions. Feelings of insecurity are instilled by politicians and the media, and sustained by urban fortification, technological surveillance, and economic vulnerability. Surveillance in the Time of Insecurity fuses advanced theoretical accounts of state power and neoliberalism with original research from the social settings in which insecurity dynamics play out in the new century. Torin Monahan explores the counterterrorism-themed show 24, Rapture fiction, traffic control centers, security conferences, public housing, and gated communities, and examines how each manifests complex relationships of inequality, insecurity, and surveillance. Alleviating insecurity requires that we confront its mythic dimensions, the politics inherent in new configurations of security provision, and the structural obstacles to achieving equality in societies.

Security in the Health Care Environment provides the reader with must-have information about security in the health care environment, JCAHO requirements, recordkeeping and other administrative aspects expected of the Security Department. A unique feature of the book is the inclusion of examples of security awareness programs with suggestions on how to implement them. The inclusion of forms also makes this handbook unique. One entire section of the book is devoted to security issues in specific departments such as: The maternity center, pharmacy, emergency department, business office, home care, psychiatric units, and more, making this an easy-to-use resource.
