In computing, a compiler is a computer

# Access PDF Compiler Construction For Digital

Computers  
program that transforms source code written in a programming language or computer language, into another computer language. The most common reason for transforming source code is to create an executable program. Any program written in a high-level programming language

# Access PDF Compiler Construction For Digital

Computers must be translated to object code before it can be executed, so all programmers using such a language use a compiler or an interpreter. Thus, compilers are very important to programmers. Impro
