Ford 351 Engine Diagram
Foundry casting codes and date codes are significant for M-block engine blocks because some blocks that were cast before March 2, 1977 at the Michigan Casting Center are prone to water jacket cracking in the lifter valley area. Blocks cast at the Michigan Casting Center after that date do not have the cracking problem.

351M & 400 Identification - TMeyer Inc

The 'Racing Boss 351' (not to be confused with the Ford 335 engine Cleveland-based Boss 351) is a crate engine from Ford Racing Performance Parts. The block was based on the 351 cu in (5,752 cc) Ford Windsor engine, but uses Cleveland sized 2.75 in (70 mm) main bearing journals. Deck height choices include 9.2 in (234 mm) and 9.5 in (241 mm).

Ford small block engine - Wikipedia

The 351W, or "Windsor" engine, manufactured between 1969 and 2001, is a member of Ford's 90-degree eight-cylinder engine family. Not to be confused with Ford's 351 "Cleveland" engine, the 351W gets its name from Ford's Windsor, Canada, plant, where it was briefly manufactured.

Ford 351W Block Identification | It Still Runs

A year later, the 351 high output(W HO) was offered and with 210 horsepower it was the most powerful engine available in a Ford truck next to the 460 Big Block, and the 351W HO was the most powerful engine available in the F150. The 351W offered 150 and 210 horsepower until 1985 when the lower powered 351 was discontinued.

The 351 Windsor Ford Engine - Ford-Trucks.com

Ford offered two versions of the 351 engine, a Windsor 351 and a Cleveland 351. The Windsor motor is considered a small block. The Cleveland 351 is between a small block and a big block. Even though the Cleveland 351 came from the small block family, few parts will interchange. The heads on the 351 4 barrel engine were very similar to the Boss ...

351 Engine Specifications, Cleveland, Windsor, Boss ...

Produced from 1969 to 1996, the Ford 251 Windsor was based on the smaller 302 engine design and was originally intended for use in passenger cars. In following years, the 351 was added to trucks, and versions were installed as marine engines as well. Several design changes took place during their production that were ...

Specifications for a 351 Windsor Engine | It Still Runs

Ford 351 Cleveland Engines: Block Identification Guide There has always been some confusion when it comes to Cleveland block identification. The 351C block castings, despite different casting numbers, are all basically the same casting and can all be converted to four-bolt main caps with help from a ...

Small-Block Ford Rebuild Guide: How to Assemble the Short ...

Cleveland small-block: The Ford 335 small-block family introduced in 1969, was referred to as the "Cleveland" engine, due to the fact that they were built in the Cleveland engine plant. They came in 351 cubic-inch and 400 cubic-inch variants, and were known for their large port and valve sizes, and remained in production until 1982.

1979 Ford 351m Vacuum Diagram - Wiring Diagram Pictures

The Ford 351 Windsor was first introduced in 1969 and was quite a breakthrough in regards to the ways Ford produced its V8 engines. When Ford introduced the 302 to replace the 289 the engines were very similar and even used the same pistons.. The 351 Windsor was in a league of its own because of its heightened deck block, larger connecting rods and much "beefier" main bearing caps.
