Inside you'll find these features: Star Story Read the Banksy story and find out what drives the mystery man to paint. Big Debate Is graffiti art or an act of vandalism? You decide! World View Take a look at the best graffiti art in the world.

This collection of unique works by 150 Los Angeles graffiti and tattoo artists represents an unprecedented collaboration across the city's diverse artistic landscape. Many graffiti artists carry sketchbooks, called black books, and they ask crew members and others whose work they admire to inscribe their books with lettering or drawings. A few years ago, the Getty Research Institute invited artists, including Angst, Axis, Big Sleeps, Chaz, Cre8, Defer, EyeOne, Fishe, Heaven, Hyde, Look, ManOne, and Prime, to consider the idea of a citywide graffiti black book. During visits to the Getty Center, the artists viewed rare books related to calligraphy and letterforms, including works by Albrecht Dürer and Leonardo da Vinci. The artists instantly recognized the connections to their own practices and were particularly drawn to a liber amicorum (book of friends), a form of autograph book popular in the seventeenth century. Passed from hand to hand, it was filled with signatures, poetry, and coats of arms, like a black book from another era. Inspired by this meeting of minds across centuries, these artists became both creators and curators, crafting their own pages and inviting others to contribute. Eventually 150 Los Angeles artists decorated 143 individual pages. These were bound together into an exquisite artists' book that became known as the Getty Graffiti Black Book. This publication reproduces each page from the original artists' book and recounts the story of an unprecedented collaboration across the diverse artistic landscape of Los Angeles.

An examination of Los Angeles street art begins with the stylized writing used by Latino gangs in the 1930s and includes hundreds of color photographs and commentary from the artists and their "crews."

The Routledge Handbook of Graffiti and Street Art integrates and reviews current scholarship in the field of graffiti and street art. Thirty-seven original contributions are organized around four sections: History, Types, and Writers/Artists of Graffiti and Street Art; Theoretical Explanations of Graffiti and Street Art/Causes of Graffiti and Street Art; Regional/Municipal Variations/Differences of Graffiti and Street Art; and, Effects of Graffiti and

Street Art. Chapters are written by experts from different countries throughout the world and their expertise spans the fields of American Studies, Art Theory, Criminology, Criminal justice, Ethnography, Photography, Political Science, Psychology, Sociology, and Visual Communication. The Handbook will be of interest to researchers, instructors, advanced students, libraries, and art gallery and museum curators. This book is also accessible to practitioners and policy makers in the fields of criminal justice, law enforcement, art history, museum studies, tourism studies, and urban studies as well as members of the news media. The Handbook includes 70 images, a glossary, a chronology, and the electronic edition will be widely hyperlinked.

In recent years, the number of conflicts related to the misuse of street art and graffiti has been on the rise around the world. Some cases involve claims of misappropriation related to corporate advertising campaigns, while others entail the destruction or 'surgical' removal of street art from the walls on which they were created. In this work, Enrico Bonadio brings together a group of experts to provide the first comprehensive analysis of issues related to copyright in street art and graffiti. Chapter authors shed light not only on the legal tools available in thirteen key jurisdictions for street and graffiti artists to object to unauthorized exploitations and unwanted treatments of their works, but also offer policy and sociological insights designed to spur further debate on whether and to what extent the street art and graffiti subcultures can benefit from copyright and moral rights protection.

This book presents a classification system for graffiti art styles that reflects the expertise of graffiti writers and the work of art historian Erwin Panofsky. Based on Panofsky's theories of iconographical analysis, the classification model is designed to identify the style of a graffiti art piece through its visual characteristics. Tested by image cataloguers in archives, libraries, and museums, the system assists information professionals in identifying the iconic styles of graffiti art pieces. It also demonstrates the power of Panofsky's theories to provide access to non-representational or abstract art images. The result is a new paradigm for Panofsky's theories that challenges the assumptions of traditional models. This innovative book is a valuable resource for anyone who wants to learn more about graffiti art and for information professionals concerned with both the practical and intellectual issues surrounding image access.

Graffiti and street art images are ubiquitous, and they enjoy a very special place in collective imaginary due to their ambiguous nature. Sometimes enigmatic in meaning, often stylistically crude and aesthetically aggressive, yet always visually arresting, they fill our field of vision with texts and images that no one can escape. As they take place on surfaces and travel through various channels, they provide viewers an entry point to the subtext of the cities we live in, while questioning how we read, write and represent them. This book is structured around these three distinct, albeit by definition interwoven, key frames. The contributors of this volume critically investigate underexplored urban contexts in which graffiti and street art appear, shed light on previously unexamined aspects of these practices, and introduce innovative methodologies regarding the treatment of these images. Throughout, the focus is on the relationship of graffiti and street art with urban space, and the various manifestations of these idiosyncratic meetings. In this book, the emphasis is shifted from what the physical texts say to what these practices and their produced images do in different contexts. All chapters are original and come from experts in various fields, such as Architecture, Urban Studies, Sociology, Criminology, Anthropology and Visual Cultures, as well as scholars that transcend traditional disciplinary frameworks. This exciting new collection is essential reading for advanced undergraduates as well as postgraduates and academics interested in the subject matter. It is also accessible to a non-academic audience, such as art practitioners and policymakers alike, or anyone keen on deepening their knowledge on how graffiti and street art affect the ways urban environments are experienced, understood and envisioned.

Craig Costello, aka KR, grew up in Queens, New York, where graffiti was part of the landscape and a symbol of the city. While living in San Francisco, he quickly garnered attention when his signature "KR" tag popped up throughout the city. As he became one of the more prominent figures on the streets on NYC and San Francisco, he began to hone his craft by creating better tools launching his own line of homemade markers and mops, combining his moniker KR with the word INK. In KRINK: GRAFFITI, ART, AND INVENTION, Costello has compiled a visual memoir: from his early days of the '80s and '90s and launch with the hip New York City retailer Alife, which put his brand on the map, to his evolution as an artist and high-fashion collaborator. The book showcases Costello's seminal style and his extensive body of work, including site specific installations around the world. It also chronicles his myriad collaborations with Alife, Nike, Coach, Moncler, Modernica, Marc Jacobs, Levi Strauss & Co., Mini (BMW), Casio, Smith Optics, Carhartt, Kidrobot, Medicom Toy, agnès b., and Colette, among many others. Today, Costello's reach and influence goes far beyond urban street culture. Krink has grown exponentially into a global artist materials brand with expanding collections of apparel, tools, and accessories, while Costello's unique aesthetic can be seen on objects from sneakers to luxury goods to cars. KRINK is both stylish and informative, capturing the ethos of punk and hip-hop culture, and is sure to appeal to the fans of high/low cultural crossovers, as well as die-hard fans of street art and fashion.
