Software -- Programming Languages.

Introducing the abstract window toolkit; The graphic java toolkit - extending the AWT.

Written for experienced programmers who need detailed explanations of the JFC libraries, this volume covers all aspects of the swing framework. Swing is the long-awaited successor to the AWT's heavyweight components.

Describes the features of the latest release of the Java programming language, including AWT, or the Abstract Windows Toolkit, the portion that handles graphic user interfaces

This addition to the Macmillan Master Series provides an up-to-date account of all the component parts of the Internet and the World Wide Web, from architecture through to networking.

This book provides an introduction to the Java programming language and also covers other related areas such as HTML, JavaScript, CGIscript and VRML. Most of the Java programs relate to practical examples, including: \* Menus and forms \* Graphics \* Event-driven software, such as mouse and keyboard events \* Networking \* Interacting with other programs \* Animation It also covers fundamental areas such as TCP/IP and the HTTP protocol. The Java compiler, source code, background information and source code is available from the author over the Internet.

The 1.4 version of Java 2 Standard Edition provides many new programming capabilities while making plenty of old tasks easier. But without reliable guidance, you'll find it hard to take advantage of even a fraction of what the new SDK has to offer. Filled with detailed coverage of the new technology, step-by-step instruction, and tips from an acclaimed Java consultant and author, Mastering Java 2, J2SE 1.4 is the resource you'll want to keep within easy reach. Coverage Includes: \* Understanding the Java programming language \* Building forms with the Swing component set \* Creating superior graphics with the Java 2D API \* Supporting advanced data structures with the Collections API \* Improving the speed of your Java applications \* Taking advantage of Swing's support of drag and drop \* Understanding OOP concepts, including UML \* Working with Java's new assertion capabilities \* Using Java's new I/O capabilities: nonblocking read and write operations, application preferences, and logging \* Solving tough printing challenges \* Working with installation options, including Java Plug-in and Java Web Start \* Working with multiple threads and timer tasks

Part 1 includes history, language and programming concepts of Java. Part II examines the packages in Java-speak, including basic animation, transferring information between
