The Essential Therapy Guide to Cancer, Hematologic Disorders, and Supportive Care--Updated with the Latest Treatment Regimens More than 500 treatment regimens Hematology-Oncology Therapy, Second Edition is an up-to-date, comprehensive therapy guide that delivers more than 500 treatment regimens in a succinct, uniform manner. The unique tabular design allows you to instantly locate and implement the proper treatment regimen. Supported by the latest practice guidelines, peer-reviewed literature, and the opinion of experts, Hematology-Oncology Therapy integrates extensive information that is critical to both office- and hospital-based practice of hematology and oncology. Hematology-Oncology Therapy is divided into three sections: Oncology: Provides detailed information about the administration, supportive care, toxicity, dose modification, monitoring, and efficacy of commonly used and recently approved chemotherapeutic regimens, drugs, and biological agents Supportive Care, Drug Preparation, Complications, and Screening: Consists of topics commonly encountered in clinical hematology-oncology practice, such as chemotherapy-induced nausea, oncologic emergencies, radiation complications, cancer pain management, cancer screening, and much more Selected Hematologic Diseases: Delivers an authoritative guide to therapy for the principal diseases in consultative hematology This edition of Hematology-Oncology Therapy is enriched by the updating of all chapters as well as the addition of several new chapters; the new "Expert Opinion," which provides recommendations and guidance from experts on the use of treatment regimens; and inclusion of the latest regimens.

Focusing on the topics commonly found on ABFM in-training, board certification, and recertification examinations, The Family Medicine Board Review Book helps you make the most of your study time and achieve exam success. It provides valuable background information on all three AFBM exams and their formats, presents more than 1,800 multiple choice questions for self-assessment, and helps you identify areas that may require further study. Ideal for residents, practicing physicians, and nurse practitioners, this new review tool is an excellent resource for testing your knowledge of the entire field of family medicine.

Tumor Board Reviews provides comprehensive coverage of all topics in oncology. Each of the 32 chapters focuses on a specific major disease. A brief overview of epidemiology and risk factors is followed by a sequence of specific presentations organized by tumors stage or disease classification. Each discussion features a case presentation that mimics the format of a tumor board presentation and thus illustrates key diagnostic and management decisions. There is also a discussion of the evidence that supports the clinical management decisions taken in the case, based on current expert panel guidelines. Algorithms and decision tree graphics are used extensively to provide visual support of the decision process. The combination of case presentations and evidence-based management discussions make this volume a unique tool for keeping current with clinical guidelines and provides the reader with a clear understanding of applications of new information for use in daily practice.
