over the transmission (if you have the 1.8-liter engine). Set the bolts aside somewhere safe. Pull down the edge of the pan and locate the transmission drain/fill plug. Remove the plug and slide your finger into the hole. You should feel fluid at the back edge of the hole.

How do you check the manual transmission fluid? honda tra...

The automatic transmission fluid level is checked (with the engine off and the car on level ground) using the dipstick (with the yellow marking) in the right end of the transmission housing. Remove the dipstick and wipe it off. Insert the dipstick and remove it. The fluid level should be between the upper and lower marks.

American Honda Motor Company
Hondas are unique because they don't need the engine running to check the transmission fluid; although, the engine still needs to be warm, but not hot. Run the engine for about five minutes, cycling through all the transmission settings at least once before you shut it off. Figure 1. Cycle through all transmission settings.

Honda Accord: How to Check
Transmission Fluid | Honda-tech
Check the transmission fluid level by making sure the dipstick is in the locked position, then pull it out, wipe the tip with a rag and push it back down into the locked position. Pull the dipstick out again and look at the tip. There will be two lines or two dots engraved into the metal of the stick. The fluid level should be between

How to Check Manual Transmission Fluid | Autoblog

Most of the time, the level of a manual transmission is checked by placing your finger into the filler plug hole and seeing if you get some fluid onto the end of your finger. If you don't, then the fluid is low. If there is fluid at that level, then no additional fluid is needed. Step 7: Add the transmission fluid. Using the fluid pump, add fluid

into the transmission through the filler plug.

How to Check Manual Transmission Fluid | YourMechanic Advice

If you have a shifting problem with your Honda manual, check the clutch hydraulics for leaks, particularly the clutch master. These have been known to leak, and when they do they can cause shifting problems, usually grinding into gears. In addition to checking the hydraulics, check the shift linkage for worn bushings.
