LAST BOOK IN THIS SERIES. MORE THAN 900 FIVE STAR REVIEWS FOR SOCIAL MEDIA I just want my Grace back. I want the girl I discovered sending me dirty tweets on Saint Thomas. I want everything she ever wanted, and I want us to make it happen together. But the media needs more from us. More dirt. More pain. More payment for past transgressions. You can't change the past. And even though Grace is ready to put her demons to bed, mine are just starting to get restless. Because when you've silenced as many enemies as I have, you know that secret won't stay buried forever.

An explosive expose of Samsung that “ reads like a dynastic thriller, rolling through three generations of family intrigue, embezzlement, bribery, corruption, prostitution, and other bad behavior ” (The Wall Street Journal). **LONGLISTED FOR THE FINANCIAL TIMES AND MCKINSEY BUSINESS BOOK OF THE YEAR AWARD** Based on years of reporting on Samsung for The Economist, The Wall Street Journal, and Time, from his base in South Korea, and his countless sources inside and outside the company, Geoffrey Cain offers a penetrating look behind the curtains of the biggest company nobody in America knows. Seen for decades in tech circles as a fast follower rather than an innovation leader, Samsung today has grown to become a market leader in the United States and around the globe. They have captured one quarter of the smartphone market and have been pushing the envelope on every front. Forty years ago, Samsung was a rickety Korean agricultural conglomerate that produced sugar, paper, and fertilizer, located in a backward country with a third-world economy. With the rise of the PC revolution, though, Chairman Lee Byung-chul began a bold experiment: to make Samsung a major supplier of computer chips. The multimillion-dollar plan was incredibly risky. But Lee, wowed by a young Steve Jobs, who sat down with the chairman to offer his advice, became obsessed with creating a tech empire. And in Samsung Rising, we follow Samsung behind the scenes as the company fights its way to the top of tech. It is one of Apple’s chief suppliers of technology critical to the iPhone, and its own Galaxy phone outsells the iPhone. Today, Samsung employs over 300,000 people (compared to Apple’s 80,000 and Google’s 48,000). The company’s revenues have grown more than forty times from that of 1987 and make up more than 20 percent of South Korea’s exports. Yet their disastrous recall of the Galaxy Note 7, with numerous reports of phones spontaneously bursting into flames, reveals the dangers of the company’s headlong attempt to overtake Apple at any cost. A sweeping insider account, Samsung Rising shows how a determined and fearless Asian competitor has become a force to be reckoned with.

Dr. Sam Parnia faces death every day. Through his work as a critical-care doctor in a hospital emergency room, he became very interested in some of his patients' accounts of the experiences that they had while clinically dead. He started to collect these stories and read all the latest research on the subject, and then he conducted his own experiments. That work has culminated in this extraordinary book, which picks up where Raymond Moody's *Life After Life* left off. Written in a scientific, balanced, and engaging style, this is powerful and compelling reading. This fascinating and controversial book will change the way you look at death and dying.
