Through a set of case studies, a team of international scholars analyze the emerging power of the lantern show in the nineteenth and twentieth centuries within politics, religion, travel, science, health, marketing and entertainment.

This vintage book is a complete and illustrated guide to making telescopes and magic lanterns, with information on tools and materials, helpful tips, simple directions, and much more. Written in clear, plain language and designed for the novice, this is a volume that will appeal to those with an interest in metal-craft and engineering, and one that would make for a fantastic addition to collections of related literature. Many vintage books such as this are becoming increasingly scarce and expensive. This volume has been selected for modern republication due to its timeless instructional value, and is being republished now in an affordable, high-quality edition complete with a specially commissioned new introduction.

The Magic Lantern is one of those rare books that define a historic moment, written by a brilliant witness who was also a participant in epochal events. Whether covering Poland's first free parliamentary elections-in which Solidarity found itself in the position of trying to limit the scope of its victory-or sitting in at the meetings of an unlikely coalition of bohemian intellectuals and Catholic clerics orchestrating the liberation of Czechoslovakia, Garton Ash writes with enormous sympathy and power. This book is a stunningly evocative portrait of the revolutions that swept Communism from Eastern Europe in 1989 and whose aftereffects are still being felt today. As Garton Ash writes in an incisive new afterword, from the perspective of three decades later: "Freedom's battle is never finally won. It must be fought anew in every generation."

This book traces the progress of early forms of projection and describes the basic techniques pioneered by lanternists and how the magic lantern decline in popularity.
