The information overload produced by the printing press and the new forms of the structuring of knowledge are echoed in fictional works. The essays assembled in this book study the textualization of problematic forms of knowledge in medieval and early modern Spanish literature. Literary Works like the Libro buen amor, La Lozana Andaluza, or the Guzmán de Alfarache are read against the backdrop of scientific developments of their times.

The primary purpose of the Manual of Classification of Motor Vehicle Traffic Accidents is to promote uniformity and comparability of motor vehicle traffic accident statistics now being developed in Federal, state and local jurisdictions. This manual is divided into two sections, one containing definitions and one containing classification instructions.

Volume 1 looks at the introduction, adoption, and utilization of ICTs at the community level. In various contexts -- geographical, technological, socioeconomic, cultural, and institutional -- the book explores the questions of community participation. It looks at how communities in sub-Saharan Africa have reacted to the changes brought about by the introduction of these new ICTs and, in detail, presents both the opportunities and the challenges that ICTs present for community development. The book will be useful for both researchers and development practitioners active, or just embarking upon, an "ICT for development" program. It will also be a very useful reference tool not only for academics but also for policymakers, decision-makers, and development professionals interested in the issue.
