While industries such as music, newspapers, film and publishing have seen radical changes in their business models and practices as a direct result of new technologies,

Higher education

has so far resisted the wholesale changes we have seen elsewhere. However, a gradual and fundamental shift in the practice of academics is taking place.

Every aspect of

practice is seeing changes effected by the adoption and possibilities of new technologies. This book will explore these changes, their implications for higher education, the

possibilities
for new forms of
scholarly
practice and
what lessons can
be drawn from
other sectors.
