This is the transcript of a witness seminar held at the British Dental Association in March 2012. It records the changes in the roles of Dental Professionals within the United Kingdom from the start of the National Health Service to the present time. The discussion included a wide range of major participants in the politics, management and practice of Dentistry during this time. It is one of a series of seminars held as part of the John McLean History of Dentistry Archive organised between the British Dental Association and the History of Dentistry Unit at King's College London to study the profession, especially since the time of the establishment of the National Health Service in 1948.

Book jacket.

"Susan has placed the history of knitting within the context of American history, so we can clearly see how knitting is intertwined with such subjects as geography, migration, politics, economics, female emancipation, and evolving social mores. She has traced how a melting pot of knitting traditions found their way into American culture via vast waves of immigration, expanded opportunity for travel, and technology." -Melanie Falick This is the history that Knitting America celebrates. Beautifully illustrated with vintage pattern booklets, posters, postcards, black-and-white historical photographs, and contemporary color photographs of knitted pieces in private collections and in museums, this book is an exquisite view of America through the handiwork of its knitters.

Torelli's articles have been translated into English to form a unified treatment of the subject to provide a summa of recent work on a topic of major interest and relevance to all students and scholars of ancient Italy.

Three signs that something is very different with your mew man: 1. He sleeps all day . . . which would be annoying except he's so attentive at night. 2. He's attacked by sword-wielding assailants, yet insists he can handle it on his own. 3. He never seems to age. Heather Westfield has always lived a quiet life, but that all changes when she helps a very handsome, very mysterious stranger. There's something not quite right about Jean-Luc, but still, she's never been with a man so charming, so attractive . . . so wonderful. Now if only a murderous villain wasn't after them, they might get their happily-ever-after.

The first and last economic depression that you will experience in your lifetime is just ahead. The year 2009 will be the beginning of the next long-term winter season and the initial end of prosperity in almost every market, ushering in a downturn like most of us have not experienced before. Are you aware that we have seen long-term peaks in our stock market and economy very close to every 40 years due to generational spending trends: as in 1929, 1968, and next around 2009? Are you aware that oil and commodity prices have peaked nearly every 30 years, as in 1920, 1951, 1980 -- and next likely around late 2009 to mid-2010? The three massive bubbles that have been booming for the last few decades -- stocks, real estate, and commodities -- have all reached their peak and are deflating simultaneously. Bestselling author and renowned economic forecaster Harry S. Dent, Jr., has observed these trends for decades. As he first demonstrated in his bestselling The Great Boom Ahead, he has developed analytical techniques that allow him to predict the impact they will have. The Great Depression Ahead explains "The Perfect Storm" as peak oil prices collide with peaking generational spending trends by 2010, leading to a more severe downturn for the global economy and individual investors alike. He predicts the following: • The economy appears to recover from the subprime crisis and minor recession by mid-2009 -- 'the calm before the real storm.' • Stock prices start to crash again between mid- and late 2009 into late 2010, and likely finally bottom around mid-2012 -- between Dow 3,800 and 7,200. • The economy enters a deeper depression between mid-2010 and early 2011, likely extending off and on into late 2012 or mid-2013. • Asian markets may bottom by late 2010, along with health care, and be the first great buy opportunities in stocks. • Gold and precious metals will appear to be a hedge at first, but will ultimately collapse as well after mid- to late 2010. • A first major stock rally, likely between mid-2012 and mid-2017, will be followed by a final setback around late 2019/early 2020. • The next broad-based global bull market will be from 2020-2023 into 2035-2036. Conventional investment wisdom will no longer apply, and investors on every level -- from billion-dollar firms to the individual trader -- must drastically reevaluate their policies in order to survive. But despite the dire news and dark predictions, there are real opportunities to come from the greatest fire sale on financial assets since the early 1930s. Dent outlines the critical issues that will face our government and other major institutions, offering long- and short-term tactics for weathering the storm. He offers recommendations that will allow families, businesses, investors, and individuals to manage their assets correctly and come out on top. With the right knowledge and preparation, you can take advantage of new wealth opportunities rather than get caught in a downward spiral. Your life is about to change for reasons outside of your control. You can't change the direction of the winds, but you can reset your sails!
