This book examines some of the ways in which Islam is expressed in contemporary Indonesian life and politics. Editors from Australian National University.

Every political aspirant and activist knows the media are important. But there is little agreement on how an increasingly diversified media operate in post-authoritarian transitions and how they might promote, or impede, the pathways to a sustainable liberal democracy in the 21st century. This book examines the role of the media during Indonesia ' s longest experiment with democratisation. It addresses two important and related

questions: how is the media being transformed, both in terms of its structure and content, by the changing political economy of Indonesia after the fall of Suharto? And what is the potential impact of this media in enabling or hampering the development of democracy in Indonesia? The book explores the relation between the working of democratisation, by examining the role of ethnic identity and nationalism; increasingly cheaper and diversified means of media production, challenging state monopolies of the media; the reality of personalised and globalised media; and the challenging of the connection between a free media and democracy by global capitalism and corporate control of the media. The book argues that the dominant forces transforming

Today, illness is almost universally regarded as either a nuisance or a grave misfortune. In contrast to this conventional thinking, Rudolf Steiner places the suffering caused by disease in a broad vista that includes an understanding of karma and personal metamorphosis. Illness comes to expression in the physical body, but mostly does not originate in it, says Steiner, and thus a key part of the physician ' s work involves gaining insight into the whole nature of an individual – his essential core being. From this perspective, illness offers us the opportunity for deeper healing. Throughout this volume Rudolf Steiner draws our attention to the greater scope of the smallest phenomena – even a seemingly

insignificant headache. He casts vivid light on things we normally take for granted, such as the human capacity to laugh or cry, and in the process broadens our vision of human existence. The apparently mundane human experiences of forgetting and remembering are intrinsic to our humanity, for example, and have unsuspected moral and spiritual dimensions. Steiner ' s insights are never merely ' lofty ' or nebulously ' spiritual ' but time and again connect with the minutest realities of everyday life. In these 18 lectures, delivered on a weekly basis as part of an ongoing course covering ' the whole field of spiritual science ' , Steiner elaborates in detail on the diverse interplay of the human being ' s constituting aspects (physical body, etheric body, astral

body and ego or ' I ' ) in relation to rhythmic processes, developing consciousness, the history of human evolution, and our connection with the cosmos. Within this broad canvas, some of his themes acquire a very distinctive focus – such as vivid accounts of the ' intimate history ' of Christianity, ' creating out of nothing ' , the interior of the earth, and health and illness. Other topics include: the nature of pain, suffering, pleasure and bliss; the four human group souls of lion, bull, eagle and man; the significance of the Ten Commandments; the nature of original sin; the deed of Christ and the adversary powers of Lucifer, Ahriman and the Asuras; evolution and involution; the Atlantean period – and even Friedrich Nietzsche ' s madness!
