The diagram shows a ray of light as it leaves a rectangular block of glass. As the ray of light leaves the block of glass, it makes an angle with the inside surface of the glass block and an angle of 30owhen it is in the air, as shown. (i) If the refractive index of the glass is 1.5, calculate the value of .

The Geometrical Optics Workbook - 1st Edition

Geometric optics itself is a few concepts, and any good text will cover it: Born & Wolf, "Principles of Optics" Hecht & Zajak, "Optics" both contain good summaries of geometric optics, with the Born & Wolf one being much more thorough, but more arcane (the notation used in equations is very old and hard to read).
