B. F. SKINNER AND THE SKINNER BOX. B. F. Skinner is probably most remembered for the invention of what came to be called the “Skinner Box” which was a box he used in his operant conditioning controlled experiments. Challenging the traditional conditioning of Pavlov and other psychologists he based his ideas

~~Back To Top~~ B. F. Skinner was an American psychologist best-known for his influence on behaviorism. Skinner referred to his own philosophy as 'radical behaviorism' and suggested that the concept of free will was simply an illusion. All human action, he instead believed, was the direct result of conditioning.

The legacy of B.F. Skinner for social improvement is examined. A significant discrepancy is noticed between the rhetoric of change contained in his writings and the underlying philosophy of adjustment to the social order. Promises to modify the environment to advance human welfare were reverted into practices of changing individuals to promote the effective functioning of the social system.
