He envisioned an "enormous scientific expedition" involving a fleet of ten spacecraft with 70 crew members that would spend 443 days on the surface of Mars before returning to Earth.

The Mars Project - Wikipedia

The MARS Project has brought together over 40 regional & national stakeholders spanning the health economy and is adapting an innovative IT solution. MARS has been developed following consultation with commissioners, health professionals, academics and industry.

MARS Project | Saving limbs, saving lives across Manchester

It was the largest and fiercest warship in the world, named Mars after the Roman god of war. But it went up in a ball of flames during a brutal naval battle in 1564, consigning more than 800 Swedish and German sailors and a fortune in gold and silver coins to the bottom of the Baltic Sea. Join our journey to the bottom of the sea.

Maritime Archeology | The Mars Project

This classic on space travel was first published in 1953, when interplanetary space flight was considered science fiction by most of those who considered it at all. Here the German-born scientist Wernher von Braun detailed what he believed were the problems and possibilities inherent in a projected expedition to Mars.

The Mars Project by Wernher von Braun - goodreads.com

"The Mars Project is timely... von Braun's views, seen today against the debate over the role of the shuttle, the development of Space Station Freedom, and the proposal to land Earthlings on Mars early in the next century, raise questions that we still seek to answer."-Janelle Warren-Findley, co-editor of A Documentary History of the Space Age

The Mars Exploration Program studies Mars as a planetary system in order to understand the formation and early evolution of Mars as a planet, the history of geological processes that have shaped Mars through time, the potential for Mars to have hosted life, and the future exploration of Mars by humans.

NASA ' s Mars Exploration Program

Welcome to MARS The MARS project is over, it has been finished in January 2018. We have investigated how multiple stressors affect rivers, lakes and estuaries. Formerly, rivers and lakes were impacted by strong, single stressors, e.g. by organic pollution or acidification.

Welcome to MARS - MARS - MARS project

Mars One aims to establish a permanent human settlement on Mars. Several unmanned missions will be completed, establishing a habitable settlement before carefully selected and trained crews will depart to Mars. Funding and implementing this plan will not be easy, it will be hard. The Mars One team, with its advisers and with established aerospace companies, will evaluate and mitigate risks and identify and overcome difficulties step by step.

The Mars One Foundation, based in the Netherlands, managed the project. The small organization had four employees, and intended to make profits by selling media (documentaries) about the personnel selection, training and colonization. The first mission was estimated by its CEO Bas Lansdorp to cost about 6 billion dollars as of the 2010s.
