In a rapidly growing field of neuromodulation against pain, this excellent publication presents a unique compilation of the latest theoretical and practical information for electrical stimulation of the peripheral nerves. Chapters cover the use of peripheral nerve stimulation in particular indications such as migraine, cluster headache, pain in Chiari malformation and fibromyalgia, as well as in specific body parts such as head and neck, trunk, and extremities. Furthermore, chapters on history, technical aspects, mechanism of action, terminology, complications and other important aspects of this pain-relieving modality give you a full overview of the field. Written by leading experts, this publication provides a comprehensive and updated summary of the currently available scientific information on peripheral nerve stimulation. All chapters contain original information making this book an invaluable reference for all who deal with the management of severe and chronic pain - including neurosurgeons and neurosurgical trainees, pain specialists and practitioners, anesthesiologists and neurologists.

The familiar yellow Technical Instruction series from Bosch have long proved one of their most popular instructional aids. They provide a clear and concise overview of the theory of operation, component design, model variations, and technical terminology for the entire Bosch product line, and give a solid foundation for better diagnostics and servicing. Clearly written and illustrated with photos, diagrams and charts, these books are equally at home in the vocational classroom, apprentices toolkit, or enthusiasts fireside chair. If you own a car, especially a European one, you have Bosch components and systems. Covers:-Lambda closed-loop control for passenger car diesel engines-Functional description-Triggering signals

Here, Volkswagen enthusiast and prolific author Richard Copping examines, for the first time, the complete story of the T4 from the Transporter concept originated forty years before its presence at VW's Hanover factory, through its development period and full production life. Topics covered include: the background story 1949-1990; design concept to production in the 1980s; full analysis of the T4's specifications; face-lifted Caravelles and Multivans from 1996 onwards; petrol- and diesel-aspirated engines including the VR6, V6 and 2.5 litre TDI; the T4 story in the USA - the Euro Van and finally camping conversions. The complete story of the Volkswagen T4, produced between 1990 and 2003 and the first book in the English language to have been written, illustrated and published solely about the T4, beautifully illustrated with 300 colour photographs - a sparkling mixture of archive and modern-day imagery.

Introduction to Occupational Health in Public Health Practice Bernard J. Healey and Kenneth T. Walker Introduction to Occupational Health in Public Health Practice Introduction to Occupational Health in Public Health Practice uses concepts of prevention, epidemiology, toxicology, disparities, preparedness, disease management, and health promotion to explain the underlying causes of occupational illness and injury and to provide a methodology to develop cost-effective programs that prevent injury and keep workers safe. Students, health educators, employers, and other health care professionals will find that this essential resource provides them with the necessary skills to develop, implement, and evaluate occupational health programs and forge important links between public health and worker safety. Praise for Introduction to Occupational Health in Public Health Practice "Successful evidence-based health promotion and disease prevention efforts recognize that health choices and outcomes of individuals and communities are profoundly affected by their respective social and physical environments. This book is a great tool to identify opportunities and strategies to integrate and leverage efforts for the individual, family, workplace, and broader community." —Robert S. Zimmerman, MPH, president of Public Health Matters LLC, former Secretary of Health, Pennsylvania "A timely and crucial book for all health care professionals." —Mahmoud H. Fahmy, PhD, Professor of Education, Emeritus, Wilkes University

What if the story of the Rich Man and Lazarus from Luke 16 was set in a modern day setting? What would it look like? Would we recognize Lazarus? Would we recognize the rich man? The story of "The Rich Man and Lazarus" is famous for its teachings of compassion and humanity, as well as the evils of following after greed blindly, at the expense of just about everything else. "The Broker and the Bum" is a modern version of this same story found complete with all the same themes, characters, events, but simply adapted to a modern day setting. Liam Earl is a down-on-his-luck homeless man left on the streets of New York City, watching as the rich and powerful go about their daily lives. Everything is the same from day-to-day, until the kindness of a stranger changes his life for the better. Matt Herde is a powerful hedge fund manager for Asset International. Obsessed with wealth and driven by a desire for more, more, more, he has little time for people in his life whom he doesn't seem to have any use for. This includes simple beggars like Liam Earl. These two operate independently of each other until their worlds collide and a tragic event leaves one person's future in shambles, while the other finds the peace that they have sought after for so long. Will Matt find happiness? Will Liam ever escape the street? Check out "Broker and the Bum," the first book in the brand new "Parable Series" from author Brady Cook, and begin to see the world through different eyes.
