Why We Love: The Nature and Chemistry of Romantic Love. Link/Page Citation HELEN FISHER Anyone who has experienced the ecstasy of love has probably also felt the anguish of being rebuffed or falling out of love. In this book, Fisher turns a scientist's eye on feelings that are usually the realm of poets and musicians. ...

Why We Love: The Nature and Chemistry of Romantic Love ...

We need to be conscious of nature, and what it has in store for us and others. 1. Nature always has beauty somewhere. There is something beautiful to look at in all places. It can be the skyline from a mountain parallel to yours. Another great part about nature is lakes, there is always a beautiful "photo moment" that can be taken.

Why I Love Nature - The Odyssey Online

One of the better known theories, the "biophilia hypothesis," suggests that we love nature because we evolved in it. We need it for our psychological well-being because it's in our DNA. This theory rings true to me. But it's so broad, it also leaves me grasping for more.

10 Reasons Why You Feel So Good in Nature - EcoWatch

Why We Love begins by presenting the results of a scientific study in which Fisher scanned the brains of people who had just fallen madly in love. She proves, at last, what researchers had only suspected: when you fall in love, primordial areas of the brain "light up" with increased blood flow, creating romantic passion.

Why We Love: The Nature and Chemistry of Romantic Love ...

First of all, we are part of nature, and arose out of it. We like to be connected to our roots. Secondly, nature is often beautiful unless someone has scarred it by mining, clear-cutting, or just throwing trash around in it. When we see a picture, it gives us the feeling of connectedness and aesthetic pleasure as well.
