Haynes has discovered all the problems that motorcycle owners could possibly encounter when rebuilding or repairing their bikes. Documenting the most common DIY fixes with hundreds of illustrations and step-by-step instructions, this compendium of repair, modification and troubleshooting advice is applicable to all domestic and import marques.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

The 28th Annual Conference of the Center for Medieval and Renaissance Studies, held on 21-22 October 1994 at Binghamton University, featured 33 panel sessions and approximately 150 presentations. The ten essays in this volume consist of the five plenary speakers - leaders in their field - and five panel essays, each of which was reviewed for this volume. The volume comprises a body of work organised around a governing theme - modes of historicisation. Each of the essays demonstrates the practice of or a commentary upon a distinctive historicised criticism. By 'historicised' as contrasted with 'historical' criticism, it is meant that these essays problematise, stretch or reconceive traditional historical practices. Challenging the notion that the production of paintings, dramatic texts or even conduct books can be read against a stable historical ground, they show that paintings, works of literature, and treatises not only participate in history but are exemplars of textual instability. The very content of these texts can be shown, in various editions, to change over time - and yet each bears a single, determinate title. In such ways the contributions gathered here all show that they have been affected by 'the new history'.
